EXPERIENCE

Independent – Unreal Engine Interactive Developer – Charlotte, NC
2023 – Present

- Develop interactive cinematic experiences in Unreal Engine 5 using Blueprint visual scripting, Sequencer, and gameplay systems to prototype narrative-driven player interactions.
- Design prototype experiences combining animation, environmental storytelling, and interactive gameplay mechanics.
- Model game-ready characters, props, and environments in Maya, 3ds Max, and ZBrush, creating materials and textures in Substance 3D Painter and Photoshop for real-time use.
- Construct gameplay levels that balance player navigation, visual clarity, and performance.
- Implement real-time lighting, UI, and gameplay logic to support cinematic presentation.

Nickelodeon Animation Studios – Previsualization Artist (Max & the Midknights Seasons 1 and 2) – Burbank, CA
Mar 2022 – May 2023

- Delivered previs cinematics in Unreal Engine for nine episodic productions, including six full-length episodes.
- Translated storyboards and director feedback into shot design, camera layout, camera movement, character blocking, posing, and performance.
- Created rough character animation from dialogue tracks, applying timing, body mechanics, silhouette clarity, and traditional animation principles to establish acting choices and emotional beats.
- Prepared characters, props, and sets in Autodesk Maya, managing assets, testing controls and deformation, and maintaining on-model performance through revisions and production reviews.
- Tracked assets in ShotGrid (Flow Production Tracking) across Max & the Midknights production.
- Developed reusable character and prop animations and Blueprint-based lighting setups to improve previs efficiency.
- Mentored new artists on pipeline standards, file organization, and scene management; communicated production risks and potential delays to support schedule expectations.

Noggin by Nickelodeon – Animator (Independent Contractor) – New York, NY
Sep 2021 – Mar 2022

- Completed character animation for two music videos and two educational shorts in Autodesk Maya under tight timelines with minimal supervision.
- Animated characters, cameras, and props in Maya, applying body mechanics, timing, staging, and traditional animation principles to create expressive poses and clear performances.

- Interpreted storyboards and animatics to align animation with project goals, adapting to feedback and maintaining consistency across different animation styles.
- Modeled and rigged stand-in geometry in Maya and organized scenes for downstream artists to support efficient production handoffs.

Independent – Unreal Engine Cinematic Artist – Passaic, NJ
2019 – 2021

- Designed and produced real-time cinematic projects in Unreal Engine, using Sequencer, virtual cinematography, shot composition, and environmental storytelling to construct narrative sequences.
- Developed workflows integrating Autodesk Maya, Autodesk 3ds Max, ZBrush, and Unreal Engine to create animated sequences and previs-driven content.
- Modeled and animated original characters, props, and environments in Maya, 3ds Max, and ZBrush, authoring PBR materials in Substance 3D Painter and textures in Photoshop for real-time rendering.
- Applied cinematic lighting, staging, and visual hierarchy to establish mood and storytelling focus in portfolio projects.

All Things Media LLC – Senior 3D Artist – Mahwah, NJ
Mar 2010 – Sep 2019

- Produced animated and interactive content for clients including Mercedes-AMG, BMW, and Toys “R” Us.
- Modeled, rigged, animated, lit, and rendered characters, props, environments, and mechanical assets in 3ds Max for real-time and pre-rendered client deliverables.
- Created textures in Photoshop to support asset development across projects.
- Applied traditional animation principles, body mechanics, camera staging, and cinematography to clearly communicate action and visual information.
- Evaluated and modified third-party assets to meet art direction and production pipeline requirements.
- Shared workflow improvements and production best practices with teammates to support consistent quality and pipeline efficiency.

EDUCATION

The Art Institute of Philadelphia – Philadelphia, PA
Bachelor of Science (BS) in Media Arts & Animation
Associate of Science (AS) in Animation Art & Design
